

(a) Distribution of institutional integrity risk categories

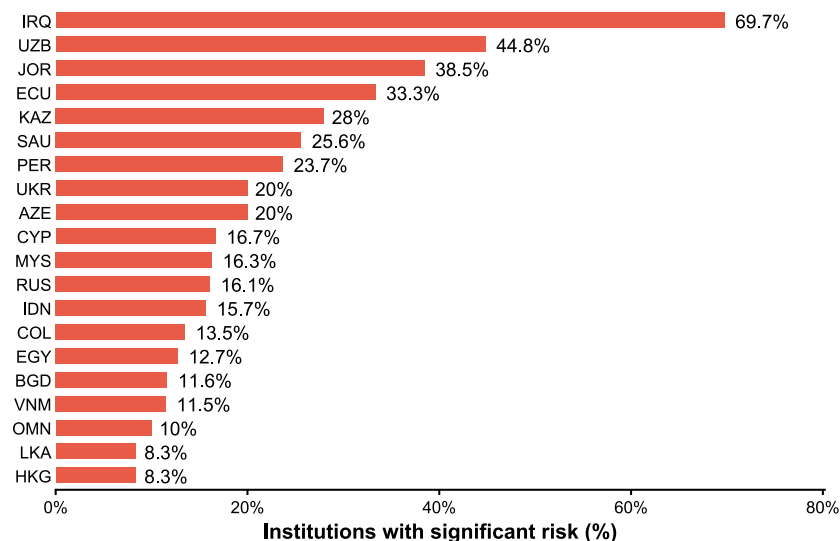

(b) Top 20 countries by number of institutions

(c) Top countries by proportion of institutions with significant risk

Included countries with ≥ 10 institutions

Supplementary Figure S1. Global distribution and country representation in the SCImago IRIS dataset. (a) Distribution of 5,475 institutions across the four IRIS structural risk categories. Bars show counts and percentages. (b) Twenty countries or territories with the largest numbers of represented institutions. (c) Countries or territories with the highest percentages of institutions in the significant structural risk category, restricted to those represented by at least 10 institutions.

Percentages in panel (c) use all IRIS institutions represented in each country or territory as the denominator. These summaries describe dataset representation and are not rankings of research integrity.
